November 8, 2004

Dear Bath Customer:

Continued high global demand for acrylic products from sheet to methyl methacrylate monomer combined with the limited availability and escalating prices of key raw materials have developed to a point that we will be announcing a price increase effective January 3, 2005.

Lucite<sup>®</sup> XL cast acrylic and Lucite Xtra<sup>®</sup> co-laminated acrylic sheet products will increase 7% effective with shipments on or after January 3, 2005.

We continue to aggressively seek ways to reduce costs and maximize efficiencies to minimize the impact of cost increases and provide you with the best value and quality in acrylic sheet products. Continued investment in market research, new product innovations and our manufacturing facilities will continue to be the driving factors in our business.

We appreciate your business and support, and look forward to continued growth and success together.

Your Lucite International Account Manager and Customer Service Representative are available to provide additional information.

Sincerely,

Chris Robinson  
Director, Sales & Marketing  
Lucite<sup>®</sup> Acrylic Surfaces
