September 2, 2004

Dear Valued Customer:

The costs of key raw materials used in the manufacture of acrylic products have continued to climb higher, while acetone and MMA remain in extremely tight supply globally. This higher cost basis and tight availability shows no signs of abating.

Because of these further dramatic feedstock escalations, it is necessary to increase the price of all Lucite® Lighting acrylic products by 8% effective with shipments on or after October 1, 2004.

Your account manager will be contacting you with regard to this adjustment, and the critical raw material factors involved.

Lucite International continues to seek to drive efficiencies and develop innovations to provide you with the best value in acrylic products. We appreciate your business and support as we work together for continued growth and success.

Sincerely,

A handwritten signature in black ink that reads "Alan Ledger".

Alan Ledger
