June 8, 2007

Dear Valued Monomer Customer,

Due to the current supply / demand dynamics present in the Methacrylates market and the relentless high cost of raw materials, a price increase is necessary for the third quarter.

Many weather experts are contending that the US Gulf will sustain up to three hurricanes in 2007 thus we are implementing a \$0.05/lb Temporary Voluntary Allowance or TVA in the event of further cost escalation in Q3 due to hurricane activity or any other extraordinary cost event.

Effective July 1, 2007, or as contracts allow, our off-list selling prices will increase per the following:

Methyl Methacrylate Monomer (MMA)	\$0.10/lb with a \$0.05/lb TVA
Methacrylic Acid (MAA)	\$0.10/lb with a \$0.05/lb TVA
N-Butyl Methacrylate Monomer (NBMA)	\$0.10/lb with a \$0.05/lb TVA
Isobutyl Methacrylate Monomer (IBMA)	\$0.10/lb with a \$0.05/lb TVA
Ethyl Methacrylate (EMA)	\$0.10/lb with a \$0.05/lb TVA
2-Ethyl Hexyl Methacrylate (2-EHMA)	\$0.10/lb with a \$0.05/lb TVA

If Q3 is absent of significant, unforeseen cost increases, the TVA will apply and the announced Q3 price increase will therefore be \$0.05/lb.

Increases for customers that are under supply contracts will become effective based upon the specific conditions of the contract. Your Account Manager will contact you shortly to review these price adjustments.

We very much appreciate your business and are dedicated to continuing to be your supplier of quality Methacrylate monomer products.

Best regards,

A handwritten signature in blue ink, appearing to read "Jay Smith".
