FOR IMMEDIATE RELEASE

Lucite Selects Jamplast, Inc. as Distributor for TufCoat® and Perspex®

Cordova, TN---Lucite International recently named Jamplast, Inc. of St. Louis, MO as its national distributor for two of the company's fastest growing product lines--- Perspex® and TufCoat®.

According to Bill Whitaker, Lucite's National Sales Manager, Polymer & Resins, "Jamplast was selected because they are uniquely positioned to service and support smaller companies. This will allow Lucite to focus on serving our larger accounts. As a relatively small firm, Jamplast has the flexibility to be very creative in meeting smaller customers' precise requirements."

John Moisson, president of Jamplast, indicated, "distribution in the plastics industry is growing rapidly because producers do not have the resources to support smaller customers, and distribution offers a more efficient way to service those accounts."

Moisson, who founded Jamplast in 1994, has had a long relationship with Lucite as a customer. Based in St. Louis, Jamplast is one of the industry's leading distributors of engineering and commodity grade thermoplastics. The company sells approximately 30 million pounds of plastic per year to over 250 companies throughout the United States and Canada.

The company was created as a thermoplastics distributor to service various North American plastic processing manufacturers, including molders, extruders, compounders and rotomolders. Jamplast owns a 75,000 sq. ft distribution center in Mt. Vernon, Indiana, and also used more than 20 contract distribution centers in the U.S and Canada to provide warehousing, distribution and packaging capabilities for plastic distribution. Moisson stated, "Our 20-plus

North American warehousing locations allows us to provide “Just-In-Time” customer stocking programs.

“We are very pleased with this new partnership,” said Whitaker. “Their organizational culture is focused on delivering quality products and developing lasting partnerships, a mirror image of our own.”

Note to Editors:

Lucite International is the world’s largest producer of methacrylates with a portfolio that includes Methyl Methacrylate (MMA) and a range of specialty monomers, which are key components in resins, surface coatings, paints, composites and specialty polymers. The portfolio also includes brands such as ‘LUCITE’, ‘ELVACITE’, and ‘PERSPEX’.

Methacrylates are the foundation for a wide range of acrylic products and are used in applications from coatings, appliances, electronics, adhesives, corporate imaging, through to baths, spas, kitchen work surfaces and construction.

Acrylic combines the unique properties of durability, weatherability, UV and scratch resistance with benefits such as light performance, optical clarity, shape and form, color flexibility and is warm to the touch.

The business is headquartered in Southampton, UK and employs more than 2,000 people around the world, selling into global markets through its network of ten customer service centers and 22 manufacturing, distribution and management locations. The Americas region headquarters is located in Cordova, TN, a suburb of Memphis.
