Dear Valued Customer:

The key raw materials used in the manufacture of acrylic sheet have continued to escalate significantly. Acetone and MMA are also extremely tight in global availability, with multiple sellers of both chemicals on sales control.

Because of these rising costs, it is necessary to increase the price of Lucite® acrylic sheet products with shipments on or after June 28, 2004.

Your account manager will be contacting you with regard to this adjustment. The attached schedule details the increase by thickness.

In addition to the industry leading packaging, program, and product innovations that Lucite International has introduced, we continue to aggressively seek to reduce costs and maximize efficiencies to provide you with the best value and quality in acrylic sheet products.

We appreciate your business and support, and look forward to continued growth and success together.

Sincerely,
